Making Animals Healthier and Safer[®]

BIOSTONETM
ANIMAL HEALTH

BioStone Animal Health is a Dallas, Texas, USA-based biotechnology company that provides innovative solutions for animal health. As you work to improve both animal health and business performance, we work together with our worldwide partners to offer you a portfolio of animal disease diagnostic products.

A focus on making animals healthier and safer

Livestock and poultry diagnostics are a critical part of our product portfolio and are inextricably tied to our focus on improving the health of the world's animals. This explains why our scientists continue to develop innovative tests and management strategies for producers, laboratories and veterinarians around the world.

A strong, reliable partner

Backed by quality, innovation, and expert technical support, BioStone Animal Health USA, together with our worldwide partners, offers a range of diagnostic products and vaccine testing kits to complement our full portfolio of products.

You can be confident that there's a rapidly growing, technology-driven company behind your diagnostics -one that will support its tests and continually develop new products to satisfy your needs for years to come.

BioStone Animal Health R&D activities ensure that our products reflect the cutting-edge of ELISA, lateral flow, and PCR technology, and allow us to continuously launch new and innovative tests.

2025-2026 product highlights

- **Nipah Virus (NiV) Antibody Test Kit (Indirect ELISA):** Multi-species iELISA designed for detection of Nipah virus antibodies to support serological surveillance, biosecurity, and outbreak preparedness.
- **Avian Influenza Virus H5/H7 (AIV-H5/H7) Real-Time PCR Detection Kit:** Specifically amplifies and detects both H5 and H7 subtypes of avian influenza virus nucleic acid from tissue and throat swabs.
- **African Swine Fever (ASF) I117L Real-Time PCR DIVA (Differentiating Infected from Vaccinated Animals) Assay:** Specifically amplifies and detects ASF virus nucleic acid from the ASF I117L gene in infected pig blood and tissue. This test differentiates between infected and those vaccinated with ASFV-G-ΔI117L.
- **Fowl Adenovirus Group I (FADV-1, 2, 4, 8a, 8b, 11) Ab Test Kit:** Specifically detects antibodies against six Fowl Adenovirus Group I serotypes (1, 2, 4, 8a, 8b, 11) in chicken serum and plasma.
- **Porcine Circovirus 3 (PCV-3) Antibody Test Kit:** Specifically detect antibodies against Porcine Circovirus 3 (PCV-3) in pig serum and plasma samples.
- **FMDV Type A, O, Asia1, Sat2 Antibodies Competitive ELISA Test Kits:** Specifically detects antibodies against FMDV Type A, O, Asia1, and Sat2, respectively, in serum and plasma samples in bovine, ovine, caprine, or swine origin. This test allows measurement of the efficacy of FMDV vaccines.
- **Caseous Lymphadenitis (Corynebacterium pseudotuberculosis) Ab Test Kit:** Specifically detect antibodies against Caseous Lymphadenitis (Corynebacterium pseudotuberculosis) in sheep/goat serum and plasma samples.
